

Oregon Explorer

 Natural Resources Digital Library

Working collaboratively to inform decisions and actions with the best available data and information

What can you do with the Oregon Explorer?

Learn about a place

Access publications and create reports for each of Oregon's communities, counties, and basins

Support planning

Search state and local planning documents or create land use maps

Search and download from 400+ GIS datasets

Quickly find and retrieve data and web services with the Oregon Spatial Data Library

Learn about Oregon's natural resources

Access information about wetlands, watersheds, biodiversity, and more

The Oregon Explorer is designed to help you find and integrate data and information from state and federal agencies, local governments, university researchers, and citizens to support informed decisions and actions by people concerned with the natural resources, environment, and communities in Oregon and the West. The Oregon Explorer was initially launched in June 2007 and has been a long-term collaboration between the Institute for Natural Resources and the Oregon State University Libraries and Press.

The site was redesigned in 2015 to enable users to access information and tools for all of Oregon's places and a more comprehensive set of topics. We strive to present data and information that is archived, neutral and maintained over the long-term. We want you to find the data you need to make informed decisions about the places you care about.

Partnerships

Our sustained success is due to the strength of our many partnerships and sponsors. These include, but are not limited to:

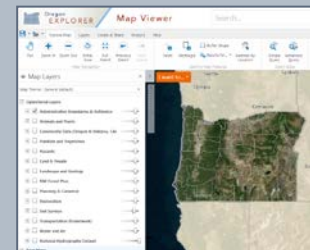

- Department of Administrative Services
- Department of Environmental Quality
- Department of Land Conservation and Development
- Department of Forestry
- Department of Fish and Wildlife
- Department of State Lands
- Oregon Coastal and Ocean Information Network
- Oregon Geographic Information Council
- Oregon Solutions
- Oregon Watershed Enhancement Board
- OSU Extension Service and Rural Studies Program
- Portland State University
- SageCon Partnership
- The Wetlands Conservancy
- The Oregon Community Foundation

Featured Tools

Oregon Explorer Map Viewer

Use free GIS software to overlay data to create, print and share customized maps

Communities Reporter Tool

Use the CRT to get social, demographic, environmental, and economic data for the 723 communities and 36 counties in

Oregon
